Our soybean checkoff.
Effective. Efficient. Farmer-Driven.

SOY
BIODIESEL
Another innovation fueled by the soybean checkoff.

Is in Michigan at the
Cedar River State Harbor

Soy biodiesel is the better choice

Soy biodiesel blends improve engine performance for boats of all sizes.

Soy biodiesel offers key advantages over petroleum, including:

- Safer marine environment and fewer hazards for water wildlife and fish.
- Reduction in the amount of black soot left on the hull of the boat from exhaust, reducing the need for scrubbing and cleaning.
- Better exhaust odor.
- Added engine lubricity.
- An easy-to-use domestic fuel source that helps family farmers and decreases our dependence on foreign oil supplies.

Cedar River State Harbor is first to offer soy biodiesel blends in Michigan

Cedar River State Harbor is the first public marina in Michigan to offer a soy biodiesel blend to boaters.

The marina is managed by the Michigan Department of Natural Resources Parks and Recreation Division. Soy biodiesel directly supports statewide programs to improve Michigan's air and water quality.

Soy biodiesel drives Michigan marine craft

Soy biodiesel, a clean-burning alternative to diesel fuel, requires few or no engine modifications and works in all diesel boats.

When you choose soy biodiesel and soy-based products, you improve your boat's performance, help support Michigan's agricultural economy, and better safeguard the environment.
